## 1. WKCLIMAD Overview

This repository contains R code and Rdata files for working with WKCLIMAD data and responses. WKCLIMAD is an ICES workshop aimed at exploring how can the short-, medium-, and long-term influences of climate change on aquaculture, fisheries, and ecosystems be accounted for in ICES Advice.

More information about WKCLIMAD can be found here:<https://www.ices.dk/community/groups/Pages/WKCLIMAD.aspx>

## 2. Visualizing the results

The interactive shiny() is downloadable by entering the following lines of code into R().

```
#Run the WKCLIMAD results
#
#'https://github.com/kholsman/WKCLIMAD

missing <- setdiff("shiny", installed.packages()[, 1])
if (length(missing) > 0) install.packages(missing)

# Load libraries:
for(lib in c("shiny"))
  suppressMessages(eval(parse(text=paste("library(",lib,")"))))

runGitHub("WKCLIMAD", "kholsman")
```
